-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 4-18 and 22-40 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must not reference back to another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4-18 and 22-40 not been further treated on the merits.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3 and 19-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Suumaki et al. (US 6847610 B1).

Consider claim 1, Suumaki discloses an arrangement for session control in a wireless communication network, comprising: means for detecting application-specific packets in a packet stream (**see fig. 5, col. 11 lines 55-60**); and means for activating, in response to the means for detecting, a plurality of packet sessions with application-specific QoS parameters, without requiring explicit cooperation of application software

(see col. 7 lines 38-41, col. 11 lines 65-67, col. 12 lines 1-2, and 46-49 - the QMOC does the QoS parameters detection independently of any type of application).

Consider claim 2, Suumaki discloses the invention of claim 1 above, Suumaki also teaches further comprising means for deactivating at least one of the plurality of packet sessions (see col. 14 lines 56-58).

Consider claim 3, Suumaki discloses the invention of claim 1 above, Suumaki also teaches wherein the wireless communication network comprises a UMTS radio access network (see col. 3 lines 31-35).

Consider claims 19-21, these are method claims corresponding to system claims 1-3. Therefore, they have been analyzed and rejected based upon the system claims 1-3 respectively.
